<p><b>COMES PRE-WIRED FOR EASY RE-ASSEMBLY ANYWHERE IN THE WORLD. OUR "KIT" RADIO STATION IS BUILT IN OREGON USA FROM MAY-SEPTEMBER</b></p>			

The "Beta" is a much larger radio station package for a small community station. All the bells and whistles of a much larger station with still room to grow. This package designed especially for Canadian Community Stations. This complete radio station "kit", with heat shrink wrapped labels and a complete wiring harness pre-made, is engineered for non-technical people who wish to assemble a radio station without a broadcast engineer onsite. Welcome to the EBS *plug and play* "Beta" Radio Station.

Requires Grounded Metal Tower Structure For Antenna
