MARC-15 ...modular, analog audio console

The MARC-15 is a feature laden, professional analog console that is perfect for ON AIR or Production uses. The modular design allows for changes or additions to the configuration and makes this console one of the easiest to service in the field, one can easily replace modules instead of components.

The full sized console features 15 channels with up to 30 inputs. Two Mix Minus channels dedicated as phone modules and a USB PC Card Computer connection makes it easy to play and record.

The MARC-15 greatly benefits from Arrakis-Systems' 30 plus years of design expertise in the field of manufacturing radio broadcast consoles.

- 8, 12 or 15 input channels in the 15 channel modular mainframe
- Three stereo Program output buses (with mono mix downs)
- 2 inputs per channel (A/B) for a maximum of 30 inputs per mainframe
- PC USB input module – Play & record from a Windows PC
- Optional studio Monitor Module for a separate Talk Studio
- Simple RJ45 Connectors
- Attractive Low Profile Table Top Design
- One World Power Supply – Automatically delivers correct voltage

MARC 15-8	8 Channels	\$4999.00
MARC 15-12	12 Channels	\$6499.00
MARC 15-15	15 Channels	\$7999.00
